Professional Summary

Principal Platform Engineer with extensive experience designing, building, and operating cloud platforms, Kubernetes environments, and reliability solutions at enterprise scale.

Deep expertise in Platform Engineering, SRE, GitOps, Infrastructure as Code, observability, and cloud-native operations on AWS, GCP, OpenShift, and Kubernetes.

Proven track record modernizing platforms, improving deployment reliability, automating infrastructure, and enabling development teams through scalable self-service capabilities.

Strong software engineering foundation with experience spanning platform automation, distributed systems, cloud migrations, and operational excellence.

Currently developing private AI infrastructure and LLMOps capabilities for secure AI deployments.

Active DoD Secret Clearance • CKA • AWS Certified • GCP Certified

Experience

Staff Site Reliability Engineer Intuit Mailchimp, Atlanta, GA

10/2024 to 05/2026

- Built performance engineering capabilities using Playwright and Gatling, enabling repeatable validation of user workflows and system behavior under load.
- Improved deployment reliability by implementing GitOps delivery pipelines with ArgoCD and Argo Rollouts, automated validation gates, and progressive canary releases.
- Enhanced platform observability, telemetry, and operational visibility across distributed systems.
- Supported enterprise cloud consolidation initiatives through lifecycle management and secure decommissioning of legacy GCP services during migration to AWS.

Lead Site Reliability Engineer UKG, Atlanta, GA

05/2023 to 10/2024

- Managed GKE cluster lifecycles, Kubernetes resource provisioning, ArgoCD application delivery, and platform add-ons to improve reliability and operational efficiency.
- Expanded observability capabilities through Datadog and OpenTelemetry onboarding across existing Kubernetes environments.
- Implemented Infrastructure as Code solutions with Terraform to automate operational visibility and Service Level Objective (SLO) reporting.
- Partnered with product and engineering teams to define reliability requirements and improve service resilience across distributed systems.

Principal DevSecOps Engineer 12/2022 to 05/2023
Raft - Department of Defense, Atlanta, GA

- Developed and maintained 10+ production-ready Terraform modules, standardizing infrastructure provisioning and accelerating platform delivery.
- Implemented FluxCD GitOps workflows for EKS on AWS, enabling declarative infrastructure management and automated application delivery.

Senior DevOps Engineer 01/2018 to 12/2022
Delta Air Lines, Atlanta, GA

- Led migration of 10+ core services to Red Hat OpenShift on AWS, implementing GitOps delivery workflows with ArgoCD to support resilient cloud-native operations.
- Built and automated 100+ CI/CD pipelines and deployment workflows, accelerating software delivery and improving operational consistency.
- Drove DevOps adoption through engineering enablement, training, and collaboration with the Cloud Center of Excellence on cloud migration and platform modernization initiatives.
- Administered enterprise-grade tools including GitLab, Jenkins, SonarQube, and Nexus to maintain high-integrity infrastructure and support secure software delivery at scale.

Infrastructure and Automation Team Lead 12/2011 to 01/2018
Amdocs - T-Mobile, Atlanta, GA

- Built and implemented automated deployment, configuration, and integration frameworks across thousands of Linux and Windows servers using Jenkins, Ansible, and Python.
- Developed deployment automation and validation tooling for production and non-production environments, improving release reliability and operational efficiency.
- Co-led a large-scale data center migration involving thousands of application instances and server environments across cross-functional engineering teams.
- Led a 10+ member infrastructure engineering team supporting 100+ environments and 3,000+ virtual machines.

Professional Foundation

Amdocs (2000–2011)

- Progressed from **Software Engineer (R&D)** to **Infrastructure & Middleware SME**. Built expertise in C/C++, Java, and enterprise-scale system integration for global telecommunications accounts.

Platform Engineering - Independent Consultant 2016 to Present
LNS IT LLC - Self Employed, Atlanta, GA

- Independent consultant specializing in Kubernetes, Cloud Infrastructure, Platform Engineering, and DevOps modernization. Operated part-time alongside full-time employment through 04/2026.
 - Delivered AWS, GCP, CI/CD, and infrastructure automation solutions for startups and SMBs.
 - Built and supported AWS Marketplace, CRM, and cloud-native platform solutions.
 - Since 05/2026, researching and developing private AI and LLMOps platform capabilities.
-

Skills

- **Clearance & Certifications:** DoD Secret Clearance, [CKA \(Certified Kubernetes Administrator\)](#), [AWS \(Certified Solutions Architect Associate\)](#) , [GCP \(Certified Cloud Engineer\)](#)
 - **Platform Engineering:** [Kubernetes](#) (GKE, EKS), [Docker](#), OpenShift, [HashiCorp Nomad](#) .
 - **GitOps & CI/CD:** ArgoCD, Argo Rollouts, FluxCD, GitLab CI, [GitHub Actions](#), Jenkins, [AWS Code Pipeline](#),
 - **Infrastructure-as-Code:** [Terraform](#), [Ansible](#), [CloudFormation](#)
 - **Observability:** OpenTelemetry, [Datadog](#), Grafana, Prometheus, ELK
 - **Cloud Platforms:**
AWS: EC2, EKS, ECS, Lambda, VPC, S3, RDS, IAM, Route 53, CloudWatch
GCP: GKE, Compute Engine, App Engine, Cloud Run, Cloud Functions, Cloud Storage, VPC Networking, IAM
 - **Programming & Automation:** [Python](#), [Go](#), [Java](#), [OAuth2 Integrations](#) , [REST APIs](#), [Cloud Infrastructure Design](#).
 - **AI Infrastructure:** Private AI, LLMOps, Ollama, vLLM, Vector Databases
-

Education

- MBA, Finance and Capital Market ([Ono Academic College](#))
- B.Sc., Information System Engineering ([Ben-Gurion University](#))
